

## Precise measurement technology for mechanical engineering - the new catalogue is available!

The new B+B mechanical engineering catalog is here! Get an overview of the wide B+B product range in the field of mechanical engineering. From resistance thermometers and various temperature sensors to infrared measurement technology and thermocouple connectors, you will find countless measurement technology products. In addition, a large selection of accessories and supplementary materials.

B+B Thermo-Technik has been developing and producing innovative product and industry solutions with the highest quality standards for precise measuring tasks since 1984. So benefit from our many years of experience and our know-how. B+B Thermo-Technik GmbH is located in Donaueschingen in the south-west of Germany. From here, the quality products are sold worldwide. With the latest research, development and production technologies and the certifications according to DIN EN ISO 9001: 2015 and DIN EN 61340-5-1, we produce our products according to the highest quality standards. We also offer our customers the service of test certificates and DAkkS calibration certificates from our in-house calibration laboratories.

Quality and customer proximity are integral parts of the strategy, which is why B+B Messtechnik is mainly manufactured in Germany and in wholly-owned subsidiaries worldwide. Constant quality controls, flexible reactions to customer requests and changes as well as prompt deliveries are guaranteed.

Discover the quality products from B+B Thermo-Technik in the mechanical engineering catalog. A [PDF download version](#) is available on our homepage.
